

SERVICES

You are looking for a machine?

If you know the machine type, make or model, use the fast search facility. With the category search you can narrow the field and, at the lowest level of a category, either list all the machines or search on three technical parameters.

You would like a quotation?

During your Internet session, contact the dealer directly by telephone, fax, or email, or simply by completing and sending the attached enquiry form.

You haven't found a machine?

In this case MachineStock.com offers an individual search service. By filling out the search form and pressing the Enter key, your query will be simultaneously sent to all the dealers on the system.

You want to sell a machine?

Using a special input module, MachineStock.com enables you to enter your offer details and, at the press of a button, send them to all the dealers on the system.

You are looking for a dealer?

Here again, MachineStock.com can be of help irrespective of whether you are looking for a dealer in your region, your town, abroad or at home.

MachineStock.com
USED MACHINE TOOLS

AN ALL-ROUND PROFESSIONAL MACHINE SERVICE

Under the auspices of the Fachverband des Deutschen Maschinen- und Werkzeug- Grobhandels e.V. (FDM), used machine stockists provide an industry specific Internet portal giving access to thousands of used tool machinery ex-stock.

Via www.MachineStock.com, visitors to the Internet site not only have access to a pool of high quality used plant, but perhaps more importantly benefit from the concentrated expertise of the supply firms and of the services they offer. These include dismantling, transport, electrical, electronic and technical testing (revision and retrofitting), right through to demonstration of the working machine with acceptance protocols, sample machining, financial services and the FDM seal of approval. And there is no abandoning the customer after the sale. Most firms maintain their own workshops where functions are checked, any defects repaired, machines modernised and modified.

A „DEALER ONLY“ DATABASE

The network provides dealers with a facility for storing data that is not intended for the general Internet users. This area is available only to registered dealers thereby enabling for example prices to be entered. The dealer only database thus gives you access to the machine stock of all the registered users, round the clock.

A „DEALER ONLY“ INFORMATION SYSTEM

At the heart of the system is a machine administration program/goods management system MHS2000, available to every dealer on the network. With the aid of this program you can catalogue all your machines, process enquiries, produce quotations, and accept, progress and invoice orders. Not only does it enable stock lists, machine data sheets, quotations and all other essential documents to be printed, it also supports the transmission of faxes and emails directly from the program, which in turn supports all the popular standard programs.

AUTOMATIC DATA DISTRIBUTION

With the aid of the MHS2000, the dealer decides on the „fate“ of the machine data entered. Simply by setting the corresponding options, each machine can be transmitted, with no additional entries being required, on the firm's own homepage to the dealer only database or to MachineStock.com.

THE BENEFITS OF MACHINESTOCK.COM

No anonymous machine offers

All the machines are without exception listed together with the firm offering them. The user knows immediately where the machine in question is held.

Everything ex-stock - no waiting

Whilst logged on, the user can contact the supplier directly by telephone, fax or email and, by this means, obtain all the relevant information on the machine in stock.

No costs - no brokerage

No broker fees or other costs are charged for the use of

MachineStock.com

as the FDM, as the carrier of this dealer only platform for used machines does not pursue any commercial interest of its own in operating it.

MachineStock.com

Professional competence and diversity in every aspect of used machinery

- Up-to-date market overview
- Access to a pool of high quality used machinery from ex-stock dealers
- Rapid information round the clock
